Dear Mr. Larlham:

We have considered the information provided during the meeting that occurred on July 27, 1987, in Detroit, Michigan, regarding the Jefferson/Conner Industrial Revitalization Project. Tom Nowicki, of my staff, attended this meeting.

One of the most important issues is continuation of coordination. At the meeting, monthly updates were proposed. In addition, we would be contacted expeditiously if problems are identified that require immediate attention. We may provide more extensive technical guidance as we review investigation results and as specific technical questions arise.

Another issue discussed at the July 27th meeting was our review of quality assurance/quality control and health and safety plans. A commitment to USEPA's review of these plans was made in this project's environmental impact statement. At the meeting, we noted that we should be given an opportunity to review standard plans and that each contractor's plans must be consistent with the plans that we review. We encourage the City to provide us with these plans as soon as possible.

At the meeting, our facsimile numbers were requested. Our transmission number is 312-886-9096. The verification number is 312-886-3096.

Thank you for the opportunity for coordination regarding the Jefferson/Conner project. Please note that, for this project, the principle contact at the USEPA is now myself, rather than Tom Nowicki. My telephone number is FTS/312-886-7500.

Sincerely yours,

William D. Franz, Chief  
Environmental Review Branch  
Planning and Management Division
